Important Information About Your Emergency Services Benefits:

We want to make sure you have the right information about your Aetna Health Plan. Aetna administers emergency services coverage in compliance with the Affordable Care Act (ACA). Specifically, Aetna requires the same cost share copays for both in network and out of network emergency care.

Your current certificate of coverage may have different in network and out of network emergency services cost share wording. This language will be revised to reflect that out of network services cost sharing (example: out of network copay) will be the same as the in network cost sharing (example: in network copay). We'll update the language as soon as we get the required approval from the state departments of insurance.

Your plan will be administered in accordance with this revision as described above. This language change does not change the way we process your claims. We have been applying the right cost share, so we don't need to adjust any prior claim payments.
